

Know what needs to be bagged.

Thank you for choosing Vikane® gas fumigant, the treatment that is proven to rid your home of drywood termites. Now that you have chosen whole-structure fumigation with Vikane, certain steps must be taken to keep food items and other perishable goods protected during the fumigation process. It is important to know exactly which household items need to be double-bagged in special Nylofume® bags.

Sample items that will NOT require bagging:

- Any food, feed, drugs (including tobacco products) and medicinals in glass, plastic or metal bottles, jars or cans with the original manufacturer's airtight seal intact
- Any shampoo and soaps
- Cosmetics, lotions, and any other topical creams, oils and ointments that are nonmedicinal

Sample items that must be bagged or removed from the structure being fumigated:

Any food, feed, drugs and medicinals in glass, plastic or metal bottles, jars or cans where the original manufacturer's airtight seal has been broken

Chips, pasta, bread, cereals, rice, cookies, crackers and any other items packaged in plastic, paper or cardboard bags or boxes, even if they have never been opened

Beverages, snacks, sauces, drugs, medicinals or other items in metallic foil-lined containers such as pouches, boxes or blister packs

Anything in resealable containers, including plastic containers, such as milk, butter, sour cream and cottage cheese

Eggs, fruits, vegetables and any other forms of produce

Medicine, tobacco, vitamins and other ingestible pills, supplements and lozenges

Pet food and animal feed in bags and boxes

Ice cubes should be discarded and the icemaker turned off

Do not forget those items in refrigerators and freezers.

When in doubt, take it out.

Any products not listed above that may require protection should be bagged or removed from the structure being fumigated. If you have any questions about what should be bagged, please contact your local professional pest management company.
